ENERGY CONSERVATION IN SCHOOLS

Compiled by
L. Jones

This collection of references was started in 1975 for a new project 'Energy Conservation in School Buildings', and has been kept up-to-date since then.

The references, which are mainly Canadian, U.S. and U.K. publications, will provide the reader with a valuable means of pursuing their interests in energy conservation in school buildings. The articles referenced form a comprehensive picture of the many aspects of energy use in such facilities and cover areas that should be of interest to researchers, building designers, operation and maintenance engineers and school administrators.
